

Input Distribution & Advisory Center

Our World, Our Responsibility

Project Concept

INPUT DISTRIBUTION & ADVISORY CENTER (IDAC)

Palala/Kowai Town, Kpaai District,
Bong County, Liberia

Abbreviations

Abbreviation	Definition
\$	United States Dollar
GdfH	Global Development for Humanity
HHs	Households
IDAC	Input Distribution and Advisory Center
LBR	Liberia
MFIs	Microfinance Institutions
MoUs	Memorandum of Understandings
SDGs	Sustainable Development Goals
SUSU	Soup-Soup (<i>Traditional Name</i>) or Rotating Savings and Credit Association (ROSCA)
VSLAs	Village Savings and Loan Associations

02	Project Objectives and Economic Uplifting	9
03	Operational and Implementation Framework	12
04	Project Financials	15
05	Key Impact	20

Project Background and Timeline

Project Background

Key Challenges in Palala/Kowai Town, Kpaai District, Bong County

Dependence on Farming: Over 70% of the population in the Kpaai district-LBR relies on small-scale farming, which limits their income.

Affordability and Financing: Most farmers cannot afford inputs due to extreme poverty in the region and there are no financing options available.

Quality Control: Uncertified, counterfeit and expired products are sold in markets due to lack of effective control authorities.

Limited skills: Many farmers lack the necessary skills to effectively apply agricultural inputs, particularly as farming challenges evolve each year.

Low Productivity: Limited access to quality inputs and proper tools reduces yields up to 60%.

SOLUTION

Input Distribution and Advisory Center (IDAC)

Project Background

Strategic Solution - Input Distribution and Advisory Center (IDAC)

Capacity/Size:

IDAC facility structure with a 36 m^2 area, 5 m height, and a storage capacity of 110 m^3 .

Functionality:

The IDAC makes quality farming inputs affordable and accessible to smallholder farmers with appropriate guidance and instructions.

Beneficiaries:

Between 500-600 people, about 100-110 smallholder farmer families, with potential for future expansion.

Optimal Location:

The IDAC will be strategically located in Palala City, ensuring convenient access for the target communities.

Project Timeline

	Project Timeline Input Distribution and Advisory Center (IDAC), Liberia	Month 1				Month 2				Month 3				Month 4				Month 5			
		1	2	3	4	1	2	3	4	1	2	3	4	1	2	3	4	1	2	3	4
#	Key Implementation Milestones																				
1	Conduct introductory meetings with authorities, town chiefs, and households; explain goals and roles.	1																			
2	Preparation and finalisation of land purchase agreement			1																	
4	Construction of IDAC facility (storehouse, office, sanitation, roofing, etc.)					1		2		3		4									
5	Furnishing and equipping IDAC (shelves, desks, signage, weighing scale)											1		2							
6	Painting of internal and external walls; installation of windows, doors, and completion of minor finishes.															1					
7	Training of management committee (operations, recordkeeping, input handling)															1		2			
8	Procurement and delivery of first round of inputs (seeds, fertilizers, tools)															1					
9	Implement input distribution to 100 HHs; collect feedback and maintain records																	1			
10	Conduct operational assessment and official handover and set up monitoring and efficiency systems to track performance and community impact.																				

Project Objectives and Economic Uplifting

Key Project Objectives Lead to Significant Economic Uplifting

Key Objectives

Timely Access

Provide affordable seeds, fertilizers, pesticides and tools to 100-110 smallholder farmers.

Financing Options

Provide farmers with favorable financing options to facilitate the purchase of relevant inputs.

Lower Costs

Reduce input expenses by 15-20% via bulk purchasing

Capacity Building

Strengthen local farming skills, record-keeping for sustainability

Key Economic Impact

Production

Total harvest of farmers' is expected to increase by 240 tons.

Income Impact

Estimated increase in farmers' annual income is US\$ 382 (60%↑).

Employment

Creating 36 FTE* jobs in farming, logistics, and sales.

Infrastructure

Fully equipped IDAC facility with modern equipment and tools.

Food Security

80% households self-sufficient in staples & vegetables.

Database

Digital registry for data, loan history, inventory and harvest tracking.

*FTE stands for Full-Time Equivalent, meaning a standard full-time job with 172 working hours per month.

The IDAC project contributes directly to the key Sustainable Development Goals (SDGs)

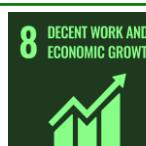

1
NO
POVERTY

2
ZERO

EQUALITY

8
DECENT WORK AND
ECONOMIC GROWTH

12
RESPONSIBLE
CONSUMPTION
AND PRODUCTION

Impact on Production, Income and Employment

Production

Total harvest of farmers' is expected to increase by 240 tons (60%↑).

Local farming products in the Palal/Kowai area include cassava, rice, bitter balls, okra, tomatoes, and cucumbers. Average size of land per farmer equals to one hectare.

The use of high-quality inputs is expected to increase farmers' production by up to sixty percent. Fertilizers help restore soil fertility, pesticides prevent pest-related losses, and efficient tools reduce labor time and waste.

Income Impact

Estimated increase in farming HHs annual income is \$ 382* (60%↑).

The projected income impact reflects farmers' anticipated increase in annual revenues once they receive the necessary agricultural inputs, modern tools, and continuous technical advisory support to optimize production and market access.

The average annual income of the HHs in the community is only US\$ 635. IDAC will increase their total income to US\$ 1.017, which equals to 60% increase.

Employment

Creating 36 FTE jobs in farming, logistics, and sales.

The IDAC will create a total of 36 following FTE jobs.

Job Created	
Security	1.00
Transportation	1.00
Technical advisory	0.50
Manager	0.50
Farming	33.0
Total jobs created	36.0

Out of 36 jobs created, 33 relates to farmers, who are the primary beneficiaries of the project.

* The projection is based on stability of market prices.

Operational and Implementation Framework

Key Operational Aspects

Tailored Input Packages

to provide relevant inputs

Bulk Purchasing

to reduce input costs

Loan Finance & Advisory

to improve affordability and to optimize farm practices

Structured Database

for records of inventory, loans and harvest

Capacity Building

for proper use of inputs to maximize productivity

Oversight & Data Collection

for project efficiency, transparency and accountability

Project Implementation Framework

Governance		<p><i>Will be managed by GDfH team together with a community-elected management committee involving local authorities.</i></p>
Operations		<p><i>Farmers will sign MOUs and become members to access the facility and services.</i></p>
Capacity Building		<p><i>Local staff and member farmers will be trained in inventory management, record-keeping, and safe input handling.</i></p>
Partnerships		<p><i>Link will be established with MFIs, SUSU clubs, and VSLAs for financing and repayment support.</i></p>
Payments & Revenue		<p><i>Inputs will be provided below the market prices; payments will be split into installments: 25% upfront and 75% after harvest.</i></p>
Farmer Contribution		<p><i>Farmer groups will develop and share their seasonal plans with the IDAC, guiding input distribution and repayment.</i></p>
Surplus Use		<p><i>Surplus will be reinvested into operation and maintenance, training, expansion, and other sustainable development projects.</i></p>

Project Financials

Overview of Project Financials

Stock Purchased

\$ 69,080

Operating Cost (Annual)

\$ 7,707

Saving Fund (Annual)

\$ 1,964

SUSTAINABILITY

The project is financially sustainable with long-term expansion potential.

Project Financials

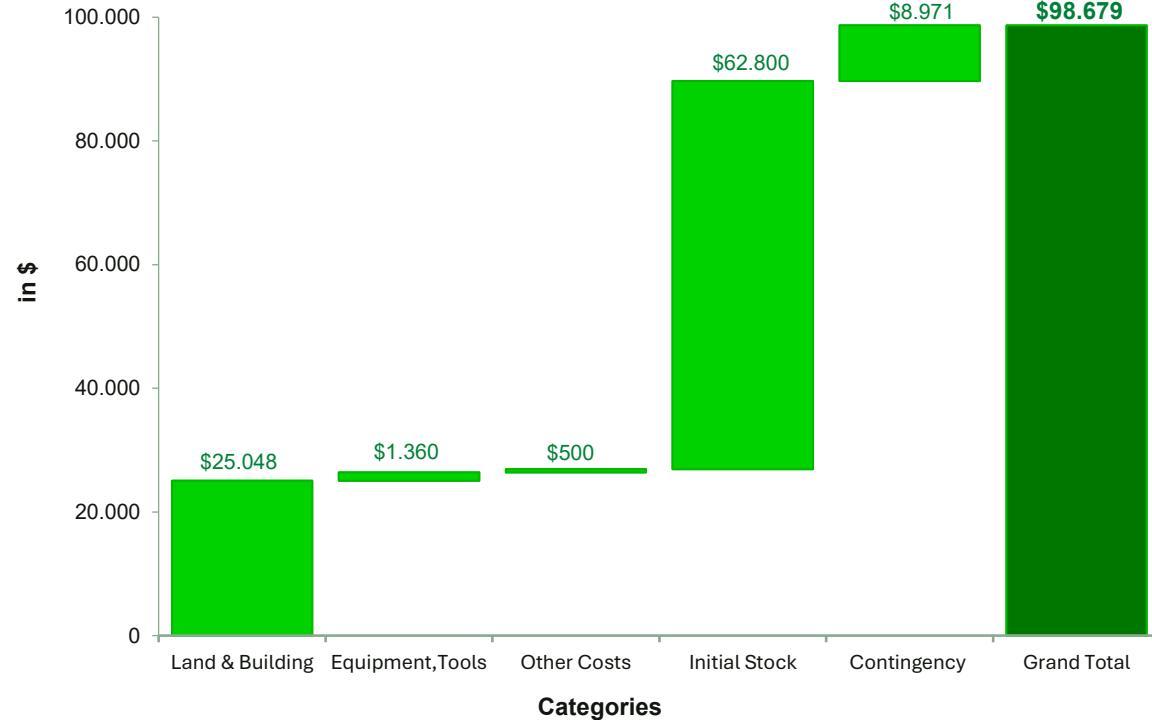

Total Initial Investment Costs

The chart illustrates the initial total investment required to establish the IDAC in Palala city, Liberia (LBR).

The total project initial investment amounts to \$ 98,679. The primary cost elements include construction costs of the building (\$ 25k) with a capacity of 110 m³, and initial costs of high-quality inputs and tools for 100–110 farmers (\$ 62,800), which include fertilizers, pesticides, land preparation, manual application, and semi-mechanized equipment and tools.

The cost estimation is based on official bids received from companies that offer GDFH better conditions due to our non-profit operational focus.

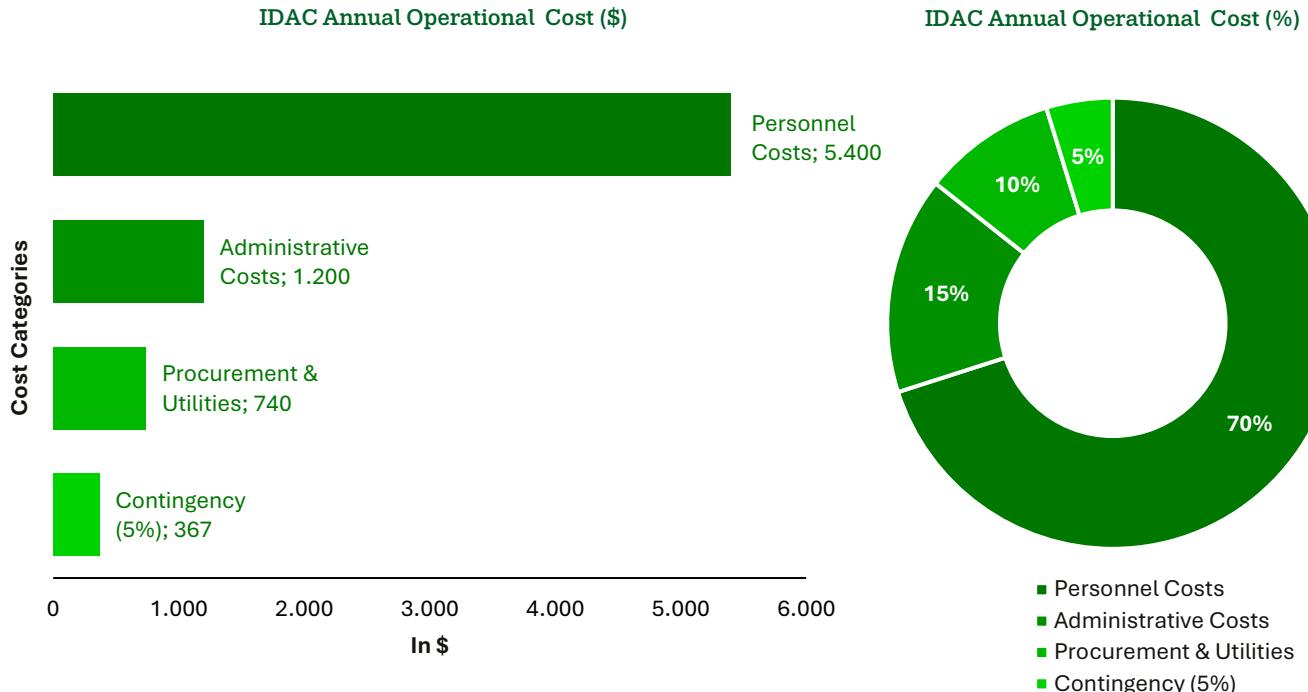

Project Financials

Annual Operating Costs

The charts illustrates the amount and percentage breakdown of the annual operating costs.

Personnel Costs (\$5,400, 70%) represent the largest expense category, covering three full-time positions annually, followed by administrative cost (\$1,200, 16%) for communication and office supplies, followed by procurement & utilities (\$740, 10%) for electricity, fuel, and transportation.

Project Financials

Annual Revenues and Savings

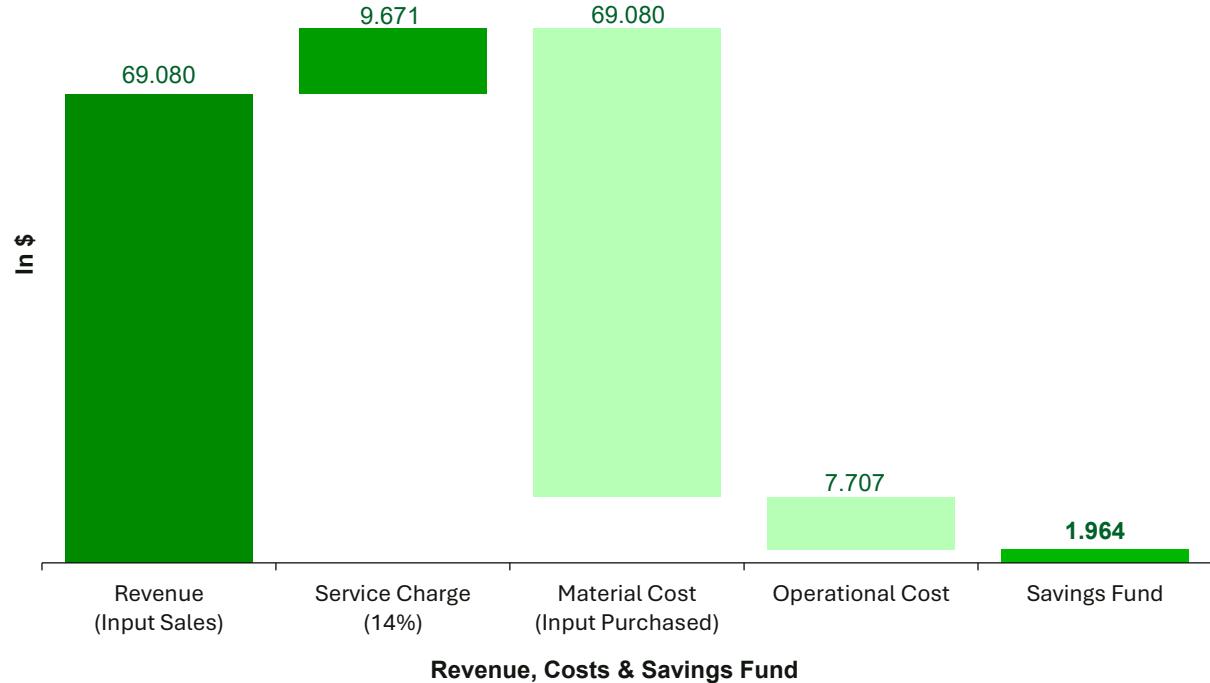

The chart illustrates the annual financial performance of the project.

Annual revenues will be derived from the sale of input products and from service fees related to consultancy and farm field oversight, which represent the two primary sources of cash inflows.

Major expenses include stock purchased (\$ 69,080) and operational costs (\$ 7,707).

After accounting for all costs, the annual savings fund of \$ 1,964 demonstrates the project's financial sustainability and potential for reinvestment in scaling up similar development projects.

Key Impact

Overview Project Impact

Access and Advisory

IDAC ensures the timely and affordable delivery of high-quality agricultural inputs and tools to 100–110 local farmers, along with technical advisory services to improve farming practices and final harvests.

Capacity Building & Proactive Management

Quality inputs, tools, and training will boost farmers' skills and productivity. Advisors will enable proactive management by anticipating forthcoming challenges and planning effective solutions.

Economic Uplifting

An estimated increased production of 240 tons of farming products leads to an average annual income increase of \$ 348 (60%) per farmer and the creation of 36 full-time equivalent jobs.

Sustainable Self-enforcing Model

A scalable, self-enforcing, and sustainable model for economic and social development, built on long-term development partnerships.

Strong Governance

Active involvement of local community leaders and authorities ensures project transparency, accountability, and cost efficiency, leading to maximum effectiveness and impact.
